Educational Innovation

Works with the Finnish Consortium for International Education to provide an

Finnish Education

Alliance for the Finnish education industry.

Sustainability Focus

Drives Sustainable ECO Innovation through the development of advanced recycling systems for businesses.

Our Skillset

How to Get the Most out of the E-Learning Platform

In addition to our versatile Learning Experience Platform, we also have our experts, offering their know-how to have you fully achieve the potential of your e-learning journey.

We take pride in having strong pedagogical, communicative and business skills, as well as expertise in software development and visual design. Your educational needs are truly in good and caring hands with us.

What our experts can do for you:

- Pedagogical consulting and educating.
- Implementation of training materials and other content creation.
- Software development expertise to customise and integrate the platform for different needs.
- Strong technical support.

AI

Course Creator

mobie
the new era of digital learning

"Get ready to launch your full course in just minutes! It's right at your fingertips, waiting to be published!"

AI Course Creator

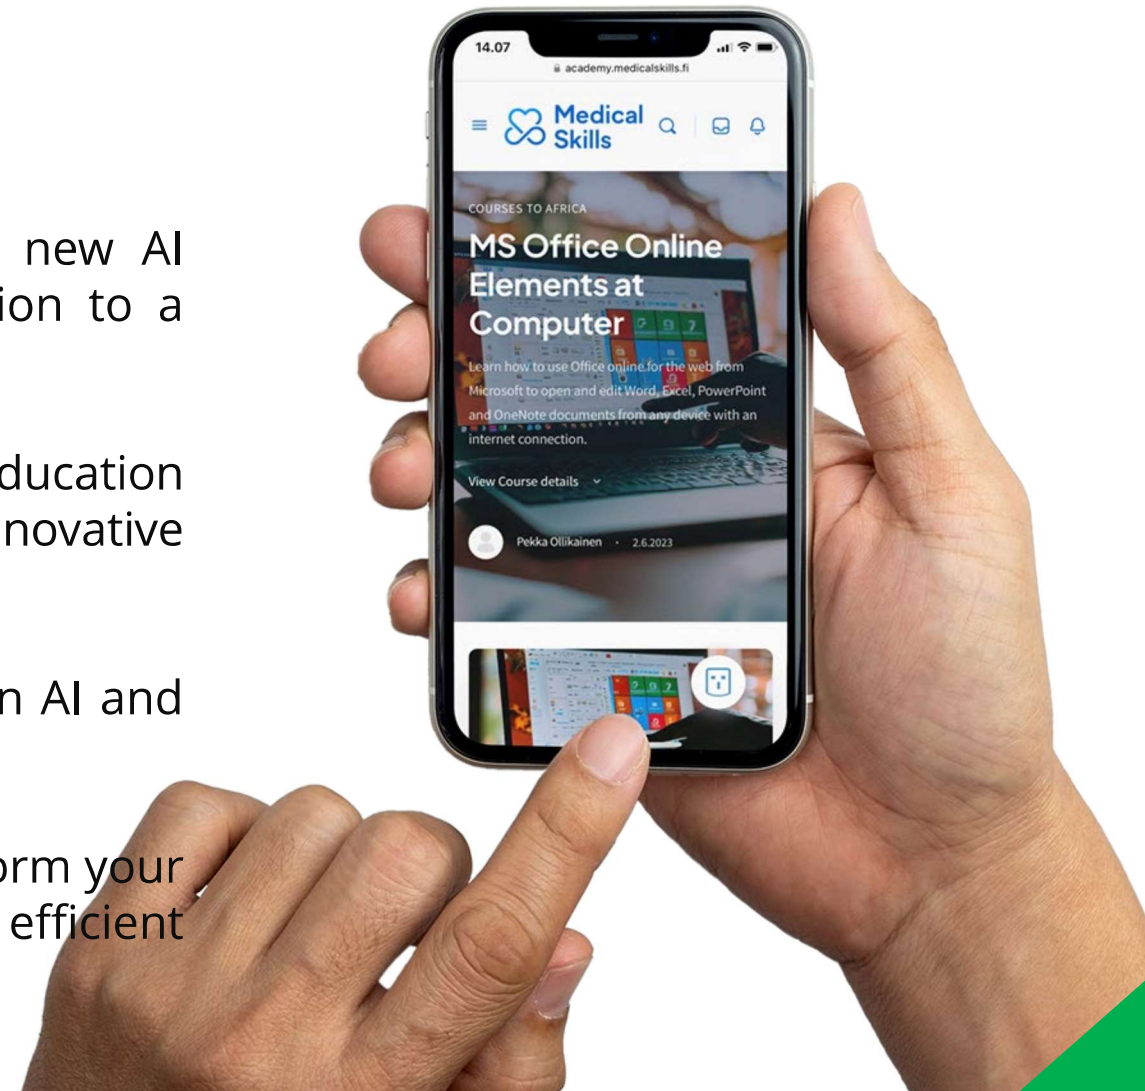

Unleash the Power of AI in Education

In 2023, we at Mobie have developed a new AI Course Creator tool, which brings education to a whole new level.

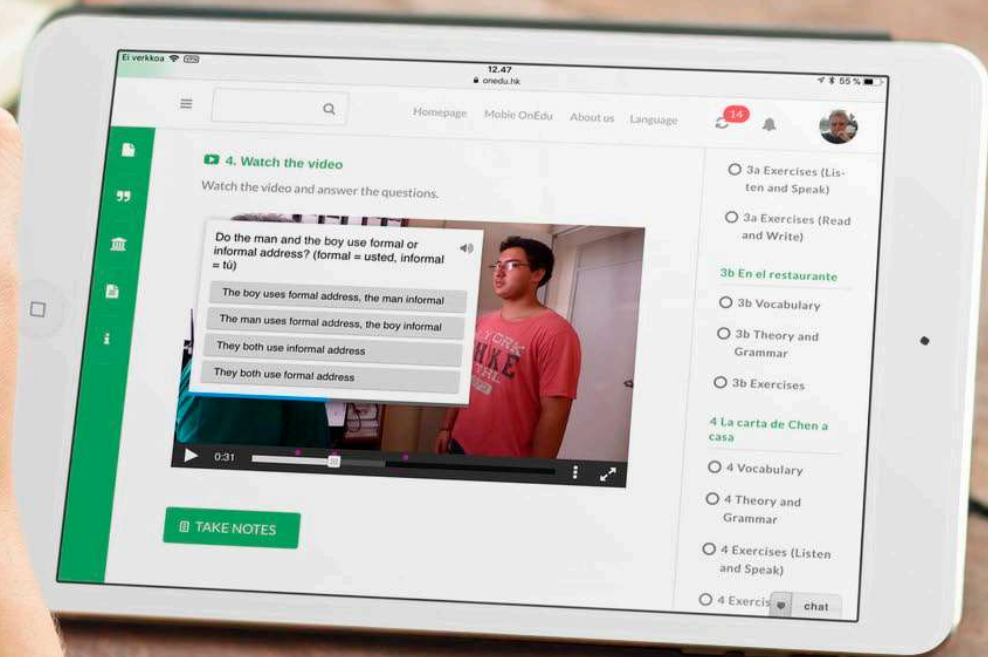

We at Finland are proud to be experts in education and are excited to lead the way into this innovative era.

Combine your substantive expertise with an AI and unlock the full potential of creating courses!

Our AI Course Creator is designed to transform your course creation process into a seamless, efficient and captivating journey.

the new era of digital learning

How the AI Course Creator Can Help You?

"Get ready to launch your full course in just minutes! It's right at your fingertips, waiting to be published!"

1. Streamlined Process

With the AI Course Creator, making a comprehensive outline of a course is fast and easy. Provide the course name, desired lesson count and an optional summary. Our advanced AI-tool will take it from there, generating a thorough course outline that covers all the essentials.

2. Elevate Engagement with Customisation

Tailor your course outline effortlessly. Edit chapter titles and summaries to align with your vision, if needed. With the AI Course Creator, you can make sure your course reflects your expertise and style.

3. From Outline to Enriched Content

With your course subjects in place, watch AI bring your content to life. In mere minutes, a full course is at your fingertips, ready for publishing!

The features of our AI Course Creator don't end there, as we have developed functions for the tool that allow you to **train the AI with your own source materials, create images for courses** inside the OnEdu and use the tool to **create ready-made, interactive and game-like H5P tasks!**

Extremely versatile solution

All that you need in a single system

- Mobie LMS is a modular and flexible system which easily accepts new features and tools.
- Includes AI Course Creator and AI Chatbot (AI Avatar 7/2025)
- The service has different interactive internal tools like, H5P, 360-degree panorama pictures and interactive videos.
- Contains internal social media functionality, including messaging walls, groups, chats, video chats, discussion forums, interactive webforums and private video meetings and calls.
- The service meets even the strictest information security requirements and works anytime, anywhere.

Globular-arc Welding

Topic Progress: ✓✓✓✓✓✓

The globular-arc welding is regarded as an intermediate step between the short-arc and the spray-arc welding. In this method, the parameters are:

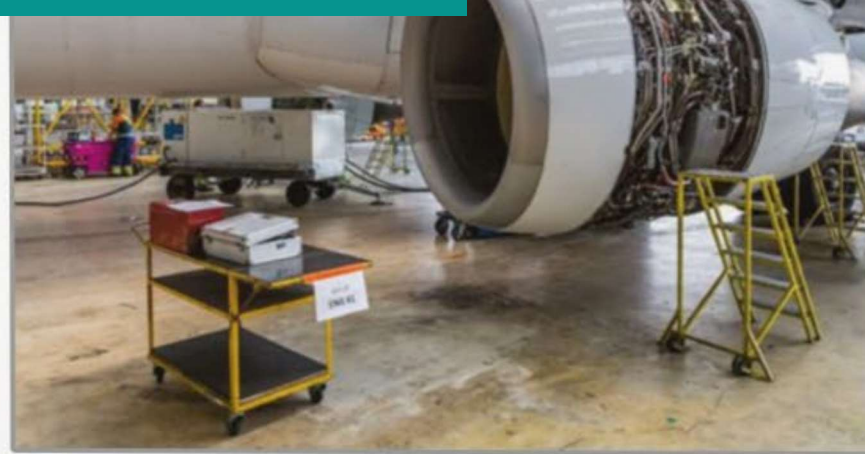

- current 180...260 A
- voltage 23...28 V

Globular Transfer

In the globular-arc welding, both the short-circuit transfer and the spray transfer without short circuits are used to transfer the filler material. The large droplets that arise in the transfer of the filler material causes excessive spatters. Usually, steps are taken to avoid the globular-arc range.

Basic characteristics

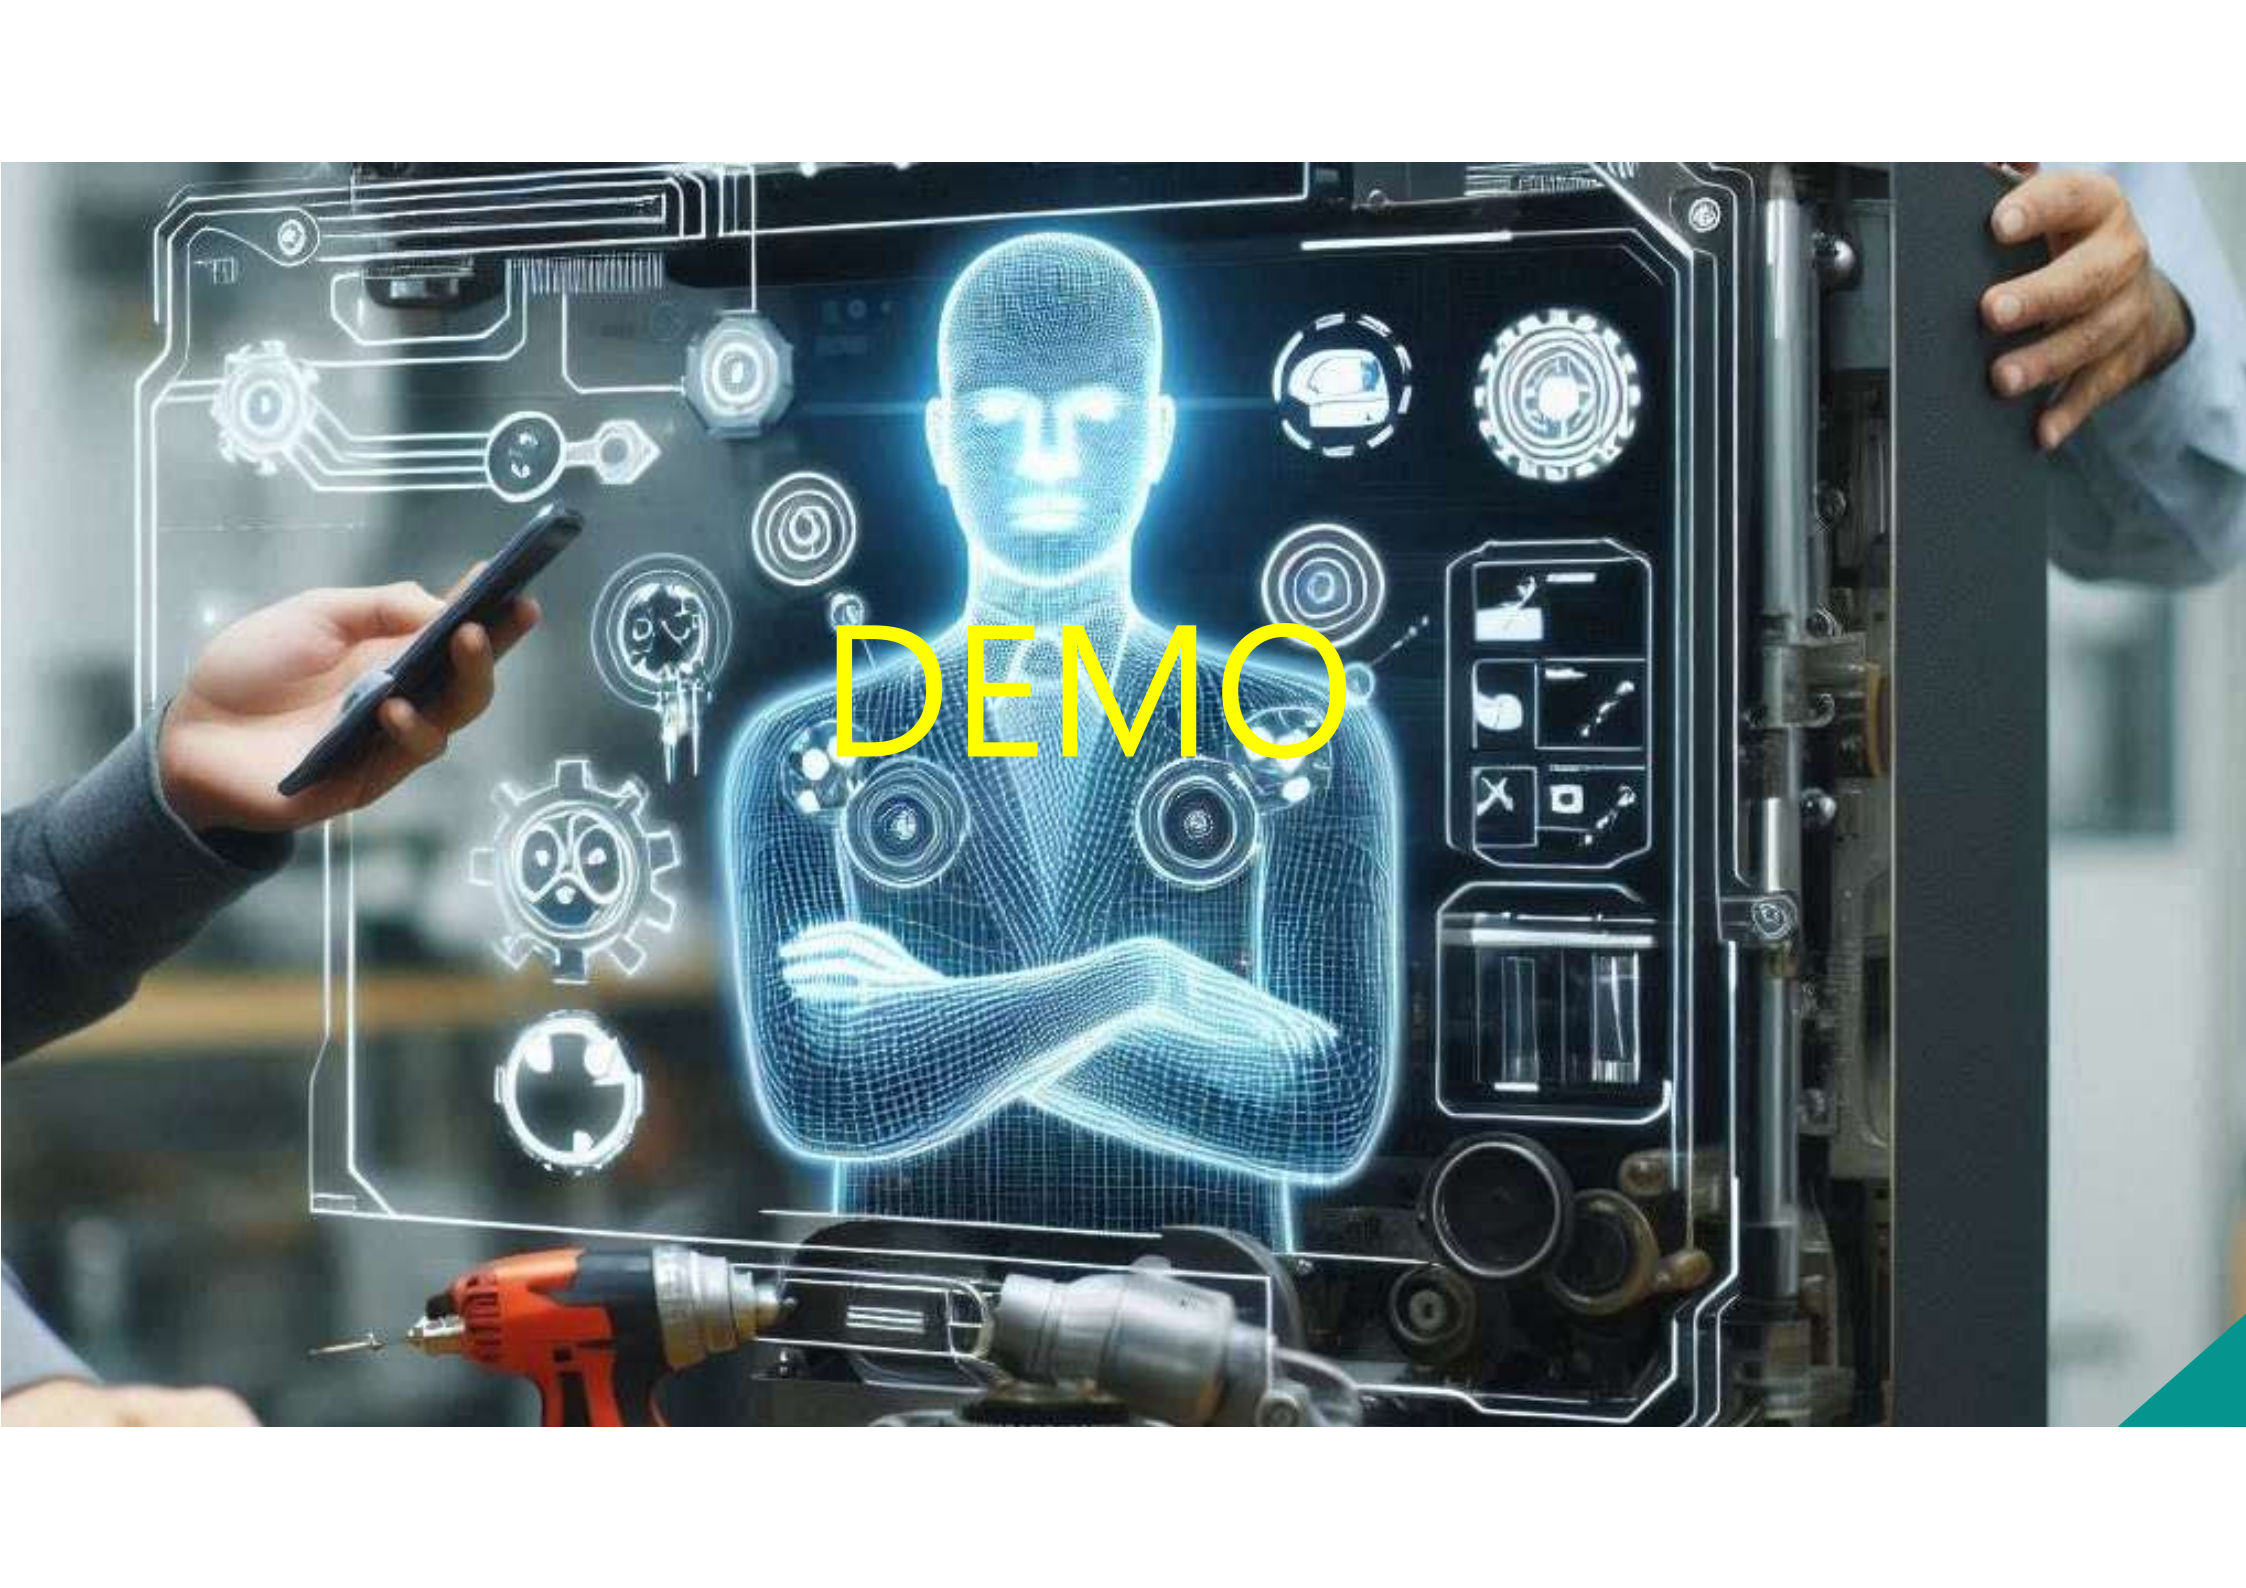

Course

Critical Maintenance Task
