

Miten teknologia voi tukea kestävän kehityksen hankinnoissa?

Emmi Lajunen
Asiakkuusjohtaja
Joulukuu 2021

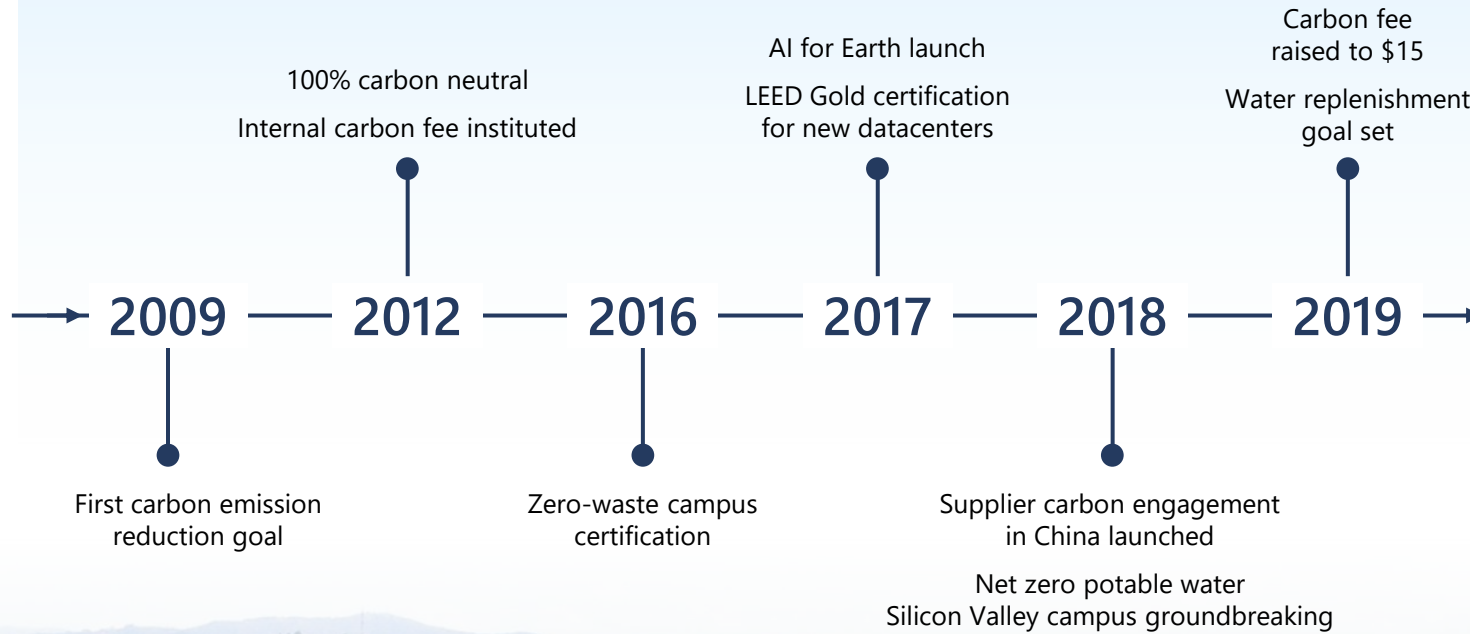

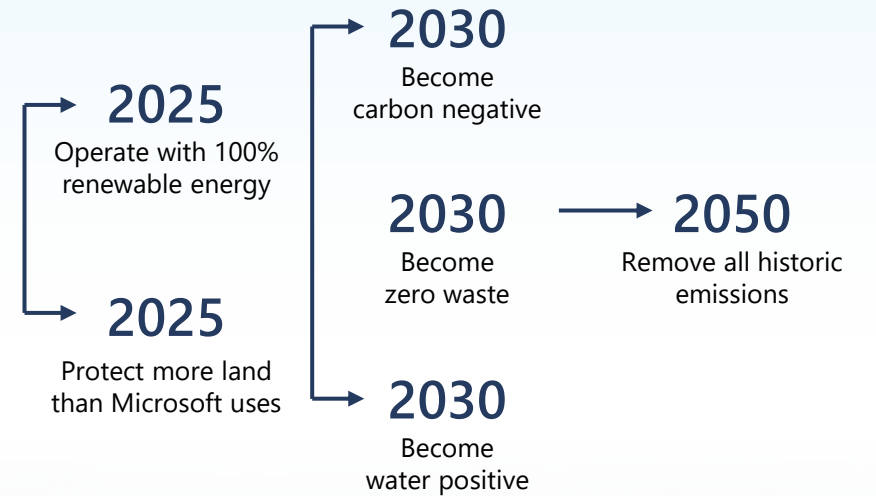

A **planet-sized** challenge

Decades of action

Our history 2009-2019

Our commitments 2020-2050

Zero waste commitments

Reuse and repurpose
devices in Microsoft
Circular Centers

Eliminate
single-use
plastics

Divert
waste

Transform
waste
accounting

Engage
our
employees

Getting to zero waste

60K

metric tons of waste diverted from landfills

\$30M

invested to build a more circular economy

90%

increase in reuse of servers demonstrated by circular center pilot

Zero

waste certification achieved for Virginia and Ireland datacenters

Carbon tax fuels innovation and drives the right behavior

Levied an **internal carbon tax** across our businesses (since 2012)

Used funds generated from the tax to **invest in reducing carbon emissions**

Increased tax in 2019 to **\$15 per metric ton**

Expanding tax to cover more scenarios

Innovation funded by carbon tax includes:

- Carbon reduction
- Carbon removal
- Water, waste, climate resilience and AI for Earth programs

Decarbonizing our supply chain requires increased transparency

Microsoft suppliers are required to report scope 1, 2, and 3 greenhouse gas emissions

We're providing support for recording and reporting their impact, increasing efficiencies, and switching to renewable energy sources

Top suppliers reduced their collective footprint by **21 million metric tons** of carbon dioxide equivalents

Our **Supplier Code of Conduct** was updated to require emissions disclosures, now part of procurement processes

To help accelerate next gen value chains, we've joined the **1.5C Supply Chain Leaders initiative**

Migrating to the Microsoft cloud reduced our carbon footprint

Microsoft moved over 2000 applications from on-premises to the cloud

Moving on-premises datacenter operations to the Microsoft cloud can reduce your carbon footprint up to

98%*

*Carbon footprint reductions will vary depending on your specific server usage, renewable energy purchases you make, and other factors. For details, please refer to [The carbon benefits of cloud computing paper](#), updated in 2020.

Microsoft Cloud for Sustainability

Delivering insights to help you accelerate every stage of your organization's sustainability journey

- Comprehensive
- Integrated
- Automated
